

SUMMER TASKS: BUGS

ART
YEAR 9

TASK ONE

PHOTOGRAPHY

Take a series of 10 photographs of bugs.

SUCCESS CRITERIA

Use your phone, camera or an ipad

Consider composition/take some close ups (look up The Boyle family) / experiment with colour.

TASK TWO

STEAMPUNK

Inspired by Steam punk artist IGOR VERNY creates articulated sculptures of bugs. Research Steampunk and IGOR VERNY's work and design a steampunk bug. If you have the resources create your design in collage or assemblage.

SUCCESS CRITERIA- Document your research show of your skills and explain ideas.

Visit; <https://www.thisiscolossal.com/2020/05/igor-verny-steampunk-sculptures/>

TASK THREE

MAKING FACES

Illustrator RICHARD WILKINSON imagines new insect species inspired by familiar faces from popular culture. Some of his recent work includes bugs design from cartoon characters. Have a look at his work and produce your own. Draw your design in biro

SUCCESS CRITERIA -Source an image of a bug and print a faint image out and then work over the top)

Visit; <https://www.thisiscolossal.com/2019/06/pop-culture-insects/>

TASK FOUR

NATALIE MACINTYRE-CLOSE UP

NATALIE MACINTYRE is an artist who specialises in drawing insects. Her work is influenced by her interest in museum collections. Some of her works depict detailed close ups of bugs. Create a close up of a bug. SUCCESS CRITERIA- Use black pen or in. Map in basic shapes first then add tone and texture through mark making. You may be able to use one of your own photos from task 1.

TASK FIVE

SCIENCE FICTION- Read this article about tardigrades on the moon.

<https://www.google.co.uk/amp/s/www.bbc.com/news/amp/newsbeat-49265125>

Tardigrades are very unusual in appearance and extremely resilient. Imagine if they did survive on the moon's surface... and then began to mutate. What would they look like? Would the reduced gravity change their shape? How would they adapt to their new environment? Present a drawing, painting, model, book cover illustration or movie poster design

SUCCESS CRITERIA- Be imaginative use biology and your previous insect studies as a source of inspiration.
